## TIPS AND TRICKS

### PAIRING

The key to pairing wines is creating a 'Marriage', not a 'Divorce'. You want similar characteristics and richness between the food and wine; so that they compliment, instead of compete against each other.

### DRY VS. SWEET

There is a time and place for both. Whilst dry wines tend to be better for pairings with food, sweet wines are ideal for opening the palate before a meal, and for closing the evening with desert.

### SPARKLING & STILL

Don't feel that there must be a special occasion to 'pop' the bubbly. Sparkling wines are great as aperitifs, and pair beautifully with light affair. Still wines cover all other bases, so try a combination of both!
