

SUSTAINABILITY INITIATIVES

Marquis Los Cabos is committed to environmental protection through the implementation of programs and policies. Several initiatives have been put into place at both the guest and staff level and include the following:

WATER DESALINATION SYSTEM

The resort has the system to turn saltwater into water that it is fit to drink, covering the 100% of our demand, and making Marquis Los Cabos a fully self-sustained property. The plants supply 14,126 ft³ of drinking water daily.

SEWAGE TREATMENT SYSTEM

The resort has two treatment plants to improve the quality of our disposed waters which are utilized for activities that do not require the use of potable water. The treatment plants are able to produce 227 oz. per second of treated water. With this system, we were able to reduce water consumption by 3,223,205 ft³ in 2019.

SEA TURTLE PROTECTION

Each summer, turtles that were born in Los Cabos return to create a nest. During that season, our team works diligently to ensure turtle mothers and babies are always protected. We are in charge of monitoring the beach to verify that the conditions are safe and hygienic for turtle nesting. Once a turtle arrives, our staff notifies the Sea Turtle Protection Network staff who come to the resort to collect the eggs and transport them to a designated area where they stay until they hatch. Once the babies are born, the team returns the newly hatched turtles to our resort so we can release them into the ocean.

ENERGY-SAVING SCHEDULES

The resort has designed programs to make our electrical consumption more efficient, according to the seasonal needs, successfully reducing our impact on the county's network. With each program put in place, we are able to save a minimum of 500,000 kilowatts per year.

LED ILLUMINATION

Our suites have only LED lighting, reducing considerably our electrical consumption on guest areas.

RECYCLING COOKING OIL

Cooking oil from all our restaurants is collected by a certified recycling company and used to create biodiesel fuel.

ADDITIONAL INITIATIVES

- Dishes are prepared with organically grown fruit and vegetables when available.
- Rapid decomposition bio-degradable disposable chinaware is available to guests upon request.
